

Are your employees reporting 100% of all incidents?

Does your incident reporting process ensure corrective actions are completed?

Does it automatically notify key personnel and assign investigators?

Is it able to handle large volumes of data easily?

Can you access comprehensive graphical reports instantly?

Simplify – for safety's sake

Rapid Incident Reporting delivers a powerful and easy to use system that fulfils all the requirements for the reporting and investigation of incidents that occur within your workplace, including statutory reporting of notifiable work-related injuries and dangerous occurrences.

A simple step-by-step process

- Log in from any internet connected device
- Record all details of the incident
- Assign people that need to be informed
- Investigate incidents to ascertain root causes
- Align corrective actions to prevent recurrence
- Obtain meaningful reports to measure trends

Reporting an incident

Rapid Incident Reporting's intuitive interface makes recording an incident simple.

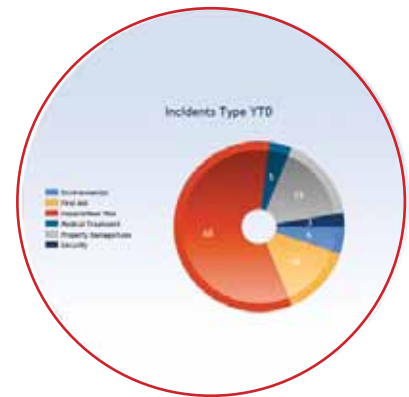

- It adapts to show only the relevant items associated with the incident
- It then builds an email distribution list to automatically keep people in the loop
- You can also configure the system to suit your organisational needs and terminology

Investigating an incident

Once an incident is reported, you can assign investigators to explore the issues associated with the incident.

- Rate potential risk through the customisable Risk Matrix
- Load images or video evidence
- Record or upload witness accounts
- Record and notify external parties
- Determine root causes and set corrective actions
- Track corrective actions
- Close out incidents
- Report on all incident types and LTI data

Corrective actions

Because Rapid Incident Reporting has been designed to enable continual improvement to workplace safety, implementing corrective and preventive actions that eliminate root causes has been made an integral part of our system.

Reports

Rapid Incident Reporting provides comprehensive and easy-to-read graphical reports on a wide range of key information areas. Graphs come complete with clickable drill-down to enable you to find data within each graph.

Reports include:

- Average Lost Time
- Age of Open Reports

- Incident Frequency Rate
- Incident Types
- Bodily Location of Injury
- Status Reports
- Safe Work Days

You can also select any number of reports to be automatically compiled into a PDF report.

Online Incident Reporting
