

The best way to create and deliver inductions

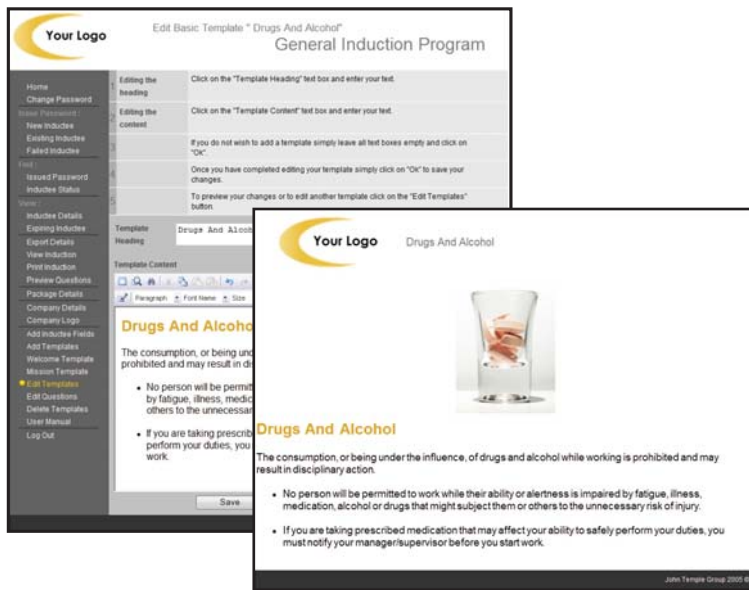

Rapid Induct is a highly developed online software system for the induction of employees, contractors and visitors which will improve and enhance your current OHS management system.

Specifically designed to handle a wide range of induction requirements to ensure your company remains proactive in achieving a safe work environment.

Australian owned and developed, Rapid Induct has recently won Australian Business Awards for its Innovation and Product Excellence.

A fully self editable and flexible framework, Rapid Induct ensures a consistent approach to delivering vital information.

Control and edit
your own content

Key Features Include

Delivers Induction Across The Internet

Rapid Induct online induction software utilises the latest web technology to induct employees & contractors effectively and efficiently via the internet, enhancing legal compliance.

Customise & Edit Your Induction Easily

Rapid Induct is simple to setup and use making it suitable for implementation throughout any organisation. The pages of your induction can be professionally created online in a simple MS Word style editor with logos, images, text, audio and video. All OHS&E requirements are easily and effectively communicated through a multimedia rich internet system to allow you to have your online induction up and running within hours.

Securely Store and Retrieve Records

Improve management of inductee records through a centralised database allowing efficient data analysis and record auditing.

Maximise Legal Compliance

Close the induction net on all employees and contractors. Verify all required personnel have completed inductions and recall records easily to demonstrate they understand the information delivered. Rapid Induct provides a full audit trail to your inductions.

Competency Based Assessment

Individual's induction results can be centrally reviewed and deficiencies easily identified. Recorded assessments quickly identify the inductees gap in understanding through any part of their induction allowing you to address these gaps through additional coaching or training. Each assessment calculates a score so you can set a minimum pass mark to ensure understanding meets your companies standards.

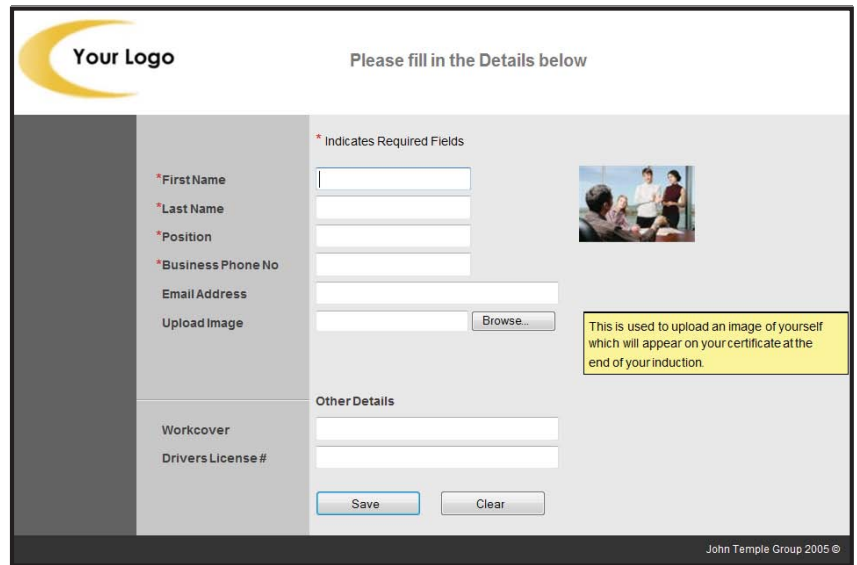

Real Customer Service & Support

Deal with real people and not an automated system. Our dedicated Customer Service and Technical Support team are there to help administrators and inductees.

High Return On Investment

Rapid Induct has been created to reduce the high cost and inherent problems that exist in inducting face to face. Internet based inductions are significantly more affordable and allow your company to take advantage of the many benefits that Rapid Induct delivers. Recover your investment through a short pay back period. You'll wish you started using Rapid Induct years ago!

Induct
Anywhere
Anytime

Key Benefits Include

Delivers Consistent Inductions To Any Location

Use Rapid Induct to ensure the same vital induction information is broadcast consistently to all inductees regardless of geographical location.

Induct Prior To Arrival On Site

Increase productivity by reducing downtime for inductees caused by travel, trainer availability and general resource limitations. Rapid Induct ensures every inductee arrives on site and is ready to work immediately.

Update Your Content Anytime At No Cost

With constant changes to regulations, company policies and worksite conditions, the self editable and flexible framework of Rapid Induct gives you control to instantly update your information.

Confirm Inductee Understanding to Reduce Injuries

Rapid Induct includes an editable questionnaire for testing inductee knowledge. Competency based training ensures that individual inductees demonstrate their understanding of your unique safety message. Lost time injuries and fatalities can be significantly reduced with a comprehensively inducted & trained workforce.

Centralised and Secure Personnel Records

Inductee records and results are stored on our world class secure servers and protected with 128 bit encryption. Only your authorised administrators can view your data and these records and results can be exported to MS Excel for further use. See our privacy policy (<http://www.rapidinduct.com.au/help.asp>) for more information on how we protect your data.

Direct Help For Inductees

Your inductees have direct access to the Rapid Induct support team. Our friendly customer service officers are available to ensure a smooth induction process. This support team ensures all inductees regardless of computer skill level are assisted and relieves the load on your OHS administrators and trainers .

Rapid Induct is a hosted web based application. This page explains the standard security features and advantages of the system

System Security Information

The Rapid Induct online induction system is hosted with Rapid Induct

Rapid Induct provides fast and reliable high performance web services in Australia. It allows fast web access by visitors in Australia and services our international target market through USA web hosting. Our service in Australia is connected to multiple Tier-1 backbones for the highest on-shore and International throughput and reliability. This enables us to provide optimal routing locally, intra-Asia as well as the rest of the world.

Our Australian servers are located in a world class data centre in Sydney

Run by an international data centre company. This means that our servers are running in a secure, controlled and optimum environment thanks to the world class data centre management. Standard features of the data centre includes dozens of domestic and international carriers through multiple fibre links to the building, biometric security system with two stage entry, state of the art power and environment system (cooling, fire and smoke detection – VESDA) and structured cabling. Rapid Induct is committed to providing a dependable service on web hosting solutions ranging from simple to complex applications and eCommerce solutions.

SSL Technology

What is SSL?

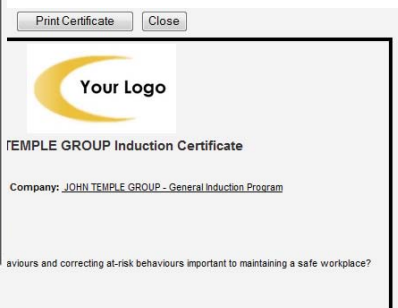

Secure Sockets Layer, SSL, is the standard security technology for creating a strong encrypted link between a web server and a browser. This link ensures that all data passed between the web server and browser remains private and integral. SSL is an industry standard and is used by millions of websites in the protection of their online transactions with their customers. In order to be able to generate an SSL link, a web server requires an SSL Certificate. Instant SSL is such a Certificate and when installed, can be used to create secure links to protect transactions, passwords, personal details etc.

What is strong encryption?

This is another term for 128 bit encryption. All Instant SSL Certificates are strong encryption.

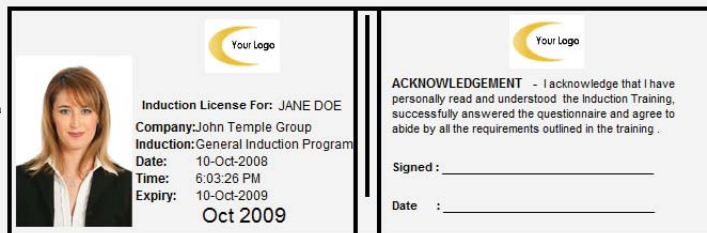

How will I know that I am using SSL?

A lock symbol will be displayed in your taskbar at the bottom of your screen.

Get started today and
be up and running in hours

- aviours and correcting at-risk behaviours important to maintaining a safe workplace?
- A1 Yes
- Smoking In The Workplace**
- Q1 When is smoking permitted in non-smoking areas?

- A1 Avoid bending your back and lift by straightening your legs
- First Aid**
- Q1 Who should you contact if you require first aid?
- A1 Your First Aid Officer or manager/supervisor.

Simple Navigation for all Users

Our system has deliberately eliminated all of the 'distracting' elements that are often found in other systems. Clean induction screens and simple navigation with limited options for the inductee to click are essential when educating a wide range of staff and contractors.

This simplicity allows those with even the most basic of computer literacy to complete an induction.

To download our Frequently Asked Questions visit <http://www.rapidinduct.com.au/help.asp>

Setup and Configuration

Our customer service team will provide training to key administrators to make sure you are up and running in the shortest possible time. Rapid Induct offer setup and configuration assistance to aid all their clients.

Further to this we offer the optional service to upload your existing induction material.
